

Allan Imire

Senior Software Developer

📍 Nairobi, Kenya ✉ allanimire@gmail.com ☎ +254727035069 🇰🇪 Kenya 🔗 LinkedIn 🐙 Github 📁 Portfolio

SUMMARY

Full stack developer with 6+ years leading work across the software lifecycle—architecture and development through deployment and mentoring. I've shipped secure, maintainable production systems in health, fintech, sustainability, and logistics. Strong in Python, Django, FastAPI, React, TypeScript, PostgreSQL, REST/GraphQL APIs, and cloud infrastructure on AWS and GCP. I mentor developers, run code reviews, coordinate multidisciplinary project teams, and push technical direction forward. I'm used to working with stakeholders across roles to turn complex requirements into reliable software.

PROJECTS

Veris | Product Engineer — Multi-Tenant AI Compliance Platform

- Built reusable React Router modules for assessments, evidence workflows, and role-based UX on a B2B multi-tenant product—aligned with backend on API design and data boundaries.
- Architected a B2B multi-tenant platform with Django, FastAPI, React Router, PostgreSQL, and RBAC—reusable modules for assessments, evidence workflows, and AI outputs with secure role-based UX.

ApplyFlow AI | Founder / Full Stack Engineer

- Designed and built a React Router + TypeScript frontend from scratch—data-fetching, responsive UI, structured output rendering—fully integrated with a FastAPI backend.
- Built end to end: FastAPI backend, React Router frontend, PostgreSQL, Pinecone, and cloud deployment—using CI/CD, automated tests, and AI-assisted dev tools to ship reliably.

WORK EXPERIENCE

Athena | Platform Engineer

04/2024 – 12/2025

- Led design and development of Node.js integrations and automation workflows, keeping them aligned with existing CRM systems and downstream tooling.
- Architected serverless GCP pipelines (Cloud Functions + Pub/Sub) for automated ingestion and async processing, improving platform reliability and scalability.
- Ran code reviews, upheld coding standards, and gave technical guidance so deliverables stayed high-quality, secure, and maintainable.
- Designed and built HubSpot CMS modules, templates, and custom HubL components—turning stakeholder requirements into working, integrated solutions.
- Improved CRM data quality and reporting reliability through event-driven middleware, monitoring, and incident analysis.
- Worked with cross-functional stakeholders to document technical solutions and improve adoption and day-to-day efficiency.

TDi Sustainability | Software Engineer

04/2022 – 08/2023 | London, UK

- Delivered complex production systems with Python, Docker, AWS EKS, RDS, GitLab CI/CD, and Nginx—managing deployments and keeping environments consistent across a multidisciplinary team.
- Built and shipped responsive frontends on REST APIs, working closely with design and product to meet functional and non-functional requirements.
- Introduced MyPy, pytest, and CI quality gates to strengthen code quality and delivery confidence.
- Automated deployment and configuration with Ansible, reducing environment drift and improving release reliability.

IM Bank Group | Frontend Engineer

09/2021 – 01/2022 | Nairobi, Kenya

- Delivered responsive, customer-facing banking UIs in a regulated financial environment—production features within three months of joining.
- Worked with UX, product, and engineering in Agile cycles, turning designs into polished, accessible banking UI.
- Ramped up on Backbase quickly under tight timelines—a skill that carries into fast-paced research-style environments.

GoodInfo Consulting, Software Engineer

02/2021 – 09/2021 | Nairobi, Kenya

- Built reusable React components for financial-services clients including Old Mutual, cutting development time and improving UI consistency.
- Integrated GraphQL and REST APIs while optimizing frontend performance.

Voyage Control | Software Engineer

05/2019 – 04/2020 | London, England

- Designed and implemented RESTful APIs in a Django backend, improving system performance by ~25% through targeted optimizations.
- Tuned database bottlenecks, reducing response times by ~30%, and built booking automation that cut manual effort by ~60%.
- Built and maintained Angular-based frontend features across the full stack in a logistics software environment.

Andela | Associate Software Engineer

09/2018 – 10/2020 | Nairobi, Kenya

- Mentored peers and improved code review practices, reducing review cycles by ~30% and raising team-wide quality standards.
- Revamped account creation workflows using Celery, improving async processing reliability at scale.
- Enhanced database performance and system architecture, improving throughput by ~30%.

SKILLS

Frontend: React, React Router, Angular, TypeScript, JavaScript, responsive UI, accessible components, performance optimization, **Cloud & Infrastructure:** AWS (ECS, RDS), GCP (Cloud Functions, Pub/Sub), Docker, Linux/Unix, Nginx, uWSGI, Ansible, deployment automation, **Delivery & Process:** Agile/Scrum, CI/CD, Git, code review, automated testing (pytest, MyPy), technical documentation, stakeholder collaboration, fast framework ramp-up, **Software development:** Python, Django, FastAPI, Node.js, REST APIs, GraphQL, PostgreSQL, SQL, authentication/authorization, RBAC, tenant-aware architecture

EDUCATION

Bsc. Information Technology, Jomo Kenyatta University Of Agriculture and Technology

01/2012 – 12/2014 | Nairobi, Kenya

CERTIFICATES

GitHub Copilot Certified: Exam GH-300 | Earned Apr 3, 2026 | Expires Apr 4, 2028
